Traditional BI vs. self-service BI

TRADITIONAL BI	SELF-SERVICE BI
Business user gathers requirements for a report/dashboard.	IT team gathers user requests for self-service tool.
User submits request to IT.	Self-service tool is implemented, giving business users access to data.
IT extracts the data and loads it into a data warehouse for analysis.	Business user accesses data directly.
IT creates data model.	Business user prepares data to include.
User approves report or dashboard, or requests changes.	Business user creates data model.
